#### The Story of a Medicine.

Ita name-"Golden Medical Discovery" was suggested by one of its most important and valuable ingredients - Golden

Seal root. Nearly forty years ago, Dr. Pierce discovered that he could, by the use of pure, triple-refined glycerine, aided by a certain degree of constantly maintained heat and with the aid of apparatus and appliances designed for that purpose, extract from our most valuable native me-dicinal roots their curative properties much better than by the use of alcohol, so generally employed. So the now world-famed "Golden Medical Discovery," for

so generally employed. So the now world famed "Golden Medical Discovery," for the cure of weak stomach, indigestion, or dyspepsia, torpid liver, or biliousness and kindred derangements was first made, as it ever since has been, without a particle of alcohol in its malky-up.

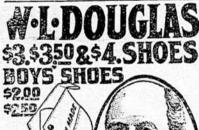

A glance anthe full list of its ingredients, printed on every bottle-wrapper, will show that it is hade from the most valuable medicinal rocks found growing in our American forests. All these ingredients have received the strongest endorsement from the leading medical experis, teachers and writers on Material Medical who recommend them as the very best remedies for the diseases for which "Golden Medical Discovery" is advised. A fittle book of these endorsements has been compiled by Dr. R. V. Pierce, of Buffalo, N. Y., and will be mailed free to any one asking same by postal card, or letter addressed to the Doctor as above. From these endorsements, copied from

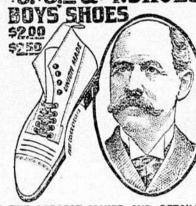

letter addressed to the Doctor as above. From these endorsements, copied from standard medical books of all the different schools of practice, it will be found that the ingredients composing the "Golden Medical Discovery" are advised not only for the cure of the above mentioned discasse, but also for the cure of all cases. only for the cure of the above mentioned diseases, but also for the cure of all catarrial, bronchial and throat affections, accompained with catarrial discharges, hoarseness, sore throat, lingering, or hang-on-coughs, and all those wasting affections which, if not promptly and properly treated are liable to terminate in consumption. Take Dr. Pierce's Discovery in time and persevere in its use until you give it a fair trial and it is not likely to disappoint. Too much must not be expected of it. It will not perform miracles. It will not core consumption in its advanced stages. No medicine will. It will cure the affections that lead up to ponsumption of taken in time.

LEGISLATURE AT WORK. Correspondence of the Alexandria Gazette )

Richmond Feb. 15.

As next Saturday is the last day on which bills can be offered in the present legislature those who have pet messures are tustling to get them in. The Byrd liquor bill will occupy the present week in the House of Delegates, and is now in the hands of the finance committee. There is considerable opposition to it, but it will avail nothing, as it is generally considered that it will pass as it comes from the committee.

The Meyers state-wide probibition bill which is the most drastic temperance legislation ever offered, will be also considered this week but its doom is sealed. The bill which has been introduced and which Mesers. Robinson and R C. L. Moncure are the patrons making the furnishing of free school books optobal with the several cit es and count es will come up for consideration before the

committee today—Tuesday.

The following bill has been introduced by Mr. Robinson Moncure: "To prohibit the use of any second-hand glass buttles picked up from the scrap pile, waste heap or junk pile, for the en-casing for sale of foodstuffs, sessonings and medicines and bodily used articles." Messre. Thompson and Harkins, representing the glass blowing interests of Alexandria, and delegates, from the Richmond glass works appeared before the general laws committee in favor of it. The second-hand glass dealers of Richmond and two attorneys and many busi-ness men opposed the bill. The doctors and boards of health of Richmond and Alexandria indorse the measure. The committee, however, recomended that it

do not pass. The report that Mr. R. C. L. Moncare, of Stafford, bad introduced a bill to repeal the law in regard to catching bass with seine certain seasons of the year, is untrue. Mr. Moncure says that he received a request from numbers of people of Fredericksburg to present such a bill, but has not, nor does he know that such a bill has been presented. One thing he says is certain, he has not and will not present such a

When Senator Martin appears in Richmond there is always something doing. He came to Richmond Saturday night and had not been in the city four hours before a great many people knew that Mr. J. Richard Wingfield, of Albemarle county, Senator Martin's home, would be the man to succeed Corporation Commissioner Willard, and was right. Delegate Moncure, of Alexandria, who has been complainng for a few days with a heavy cold, is confined to his apartments at Muphy's Hotel with la grippe. He was compelled to relinquish his duties at 2 o'clock yesterday and retire from the floor of the House, but expects again to get in the House about Wednesday.

Manassas, Va., Feb. 14, 1910. To the Editor of the Alexandria Gazette:

The regular meeting of the Farmers' astitute of Northern Virginia will be neld in the courthouse at Manassas on Friday, February 18, beginning at 10 a. m. An unusually good programme has been provided, which will be of interest to all who are engaged in farming. Dairymen will find a treat in the address of Prof. Helmer Rabild, of the dairy division of the U. S. Department of Agricu ture, who will give a talk on breeding and feeding dairy cattle with special reference to local conditions. Prof. Rabild has a wide experience in all branches of dairying and will be able to put the dairyman in touch with the most advanced thought and most practical ides of breeding and feeding. Milk production is toe largest source of income to many farmers and its importance, both relative and actual, is increasing. The speaker will be prepared to answer questions about rations, or breeding,

testing for tuberculosis, etc. The other speaker will be of even greater general interest. Prof. Cates is a native of South Osrolina and has spent several years working for the U. S. Department of Agriculture studying the problems of weeds and tillage. He has found a method of eradicating wild onions or garlic, which is both inexpensive and practical and which will form the basis of his talk. Come and ask questions about this or any other weed that gives you trouble. Ladies are especially invited to attend. Lunch well be served by the ladies of the W.

Premier Canslejas, who is regarded as the last hope of the liberals, considers the abridgment of the influence of the Oatholic Church and the inauguration of a broad system of public education as the foundation of national progress, and is committed to the execution of this programme. On the other hand, there are many evidences that the clerical party connived at the advent of Canslejas in the belief that he would fall quickly before the combined assau'ts of his ene mies and so permit the return to power of former Premier Maura.

Should Premier Canalejas fail and reaction gain the upper hand, it is corsidered probable that the opposition will assume the form of a fight for the over-throw of the monarchy, the first phase of which will be a series of political as-
